ANN HAND NEW CEO AT PROJECT FROG

**World-Class Green Energy Executive To Grow Markets and Scale Business for
Leading Manufacturer of Smart Buildings**

SAN FRANCISCO--([BUSINESS WIRE](#))--Project FROG (www.projectfrog.com), leading manufacturer of smart building systems, announced today that Ann Hand has joined the company as Chief Executive Officer. She will provide strategic leadership as Project FROG seeks to capitalize on the high growth market for green buildings with its innovative high performance building systems.

“I am delighted that Ann has decided to join the Project FROG team,” said founder Mark Miller. “I look forward to working closely with her to develop our next generation of green building products and accelerate our growth. Ann has a great track record of building scalable businesses with sustainability as a cornerstone.”

Ann is a highly experienced executive within the clean energy sector and comes to Project FROG from BP where she was Senior Vice President of Global Brand Marketing and Innovation with responsibility for driving operational performance across 25,000 retail gas stations. Prior to that role, she was CEO of BP’s Global Liquefied Petroleum Gas business unit and oversaw 3,000 employees in 15 countries. Before BP, Ann held marketing, finance and operation positions at Exxon Mobil and McDonald’s Corporation.

“I believe in the mission of this company, the quality of its people and the potential of our technology to transform the building industry,” said Ann. “I was fortunate to have the satisfaction of making things ‘a little better’ at BP, and am compelled by the opportunity at Project FROG to change how buildings are built and redefine standards for how they perform...we can make construction a *lot* better.”

Chuck McDermott, a Project FROG board member and General Partner at RockPort Capital Partners says, “Ann is a very dynamic executive who understands how to create vision and build brands. We’re confident that she will provide important leadership as Project FROG diversifies products that grow markets and monetize its game-changing innovation.”

About Project FROG

Better, Greener, Faster. Smart. Project FROG makes the most technologically advanced, energy-efficient building systems on the planet. Employing innovative clean technology across the construction spectrum, Project FROG aims to transform the building industry by creating new standards for healthy buildings that significantly reduce energy consumption and construction waste. Venture funding from Rockport Capital facilitated entrance into education and governmental markets in California, New England and Hawaii. Near-term plans include expansion into new geographies and market sectors. Project FROG's smart building systems are frequent recipients of industry awards for their design and performance.
